Carley Robinson, granddaughter of Jan Robinson (a dear friend of Priority! Evangelism and the Pounders Family), was diagnosed with Stage IV Neuroblastoma when she was 21 months old. It was in her liver, bone marrow, and adrenal glands. The tumor on her liver was the size of a football. She turned 3 in Jun 09. When the results were received a few weeks back, all the cancer was gone from her liver, bone marrow, and adrenal glands, but new cancer formed on both hips and one femur. Doctors feel all avenues of hope are now exhausted. Carley needs your prayers. God has already performed miracles, but she needs the greatest miracle now. The family is emotionally and financially devastated, but as her Mom says, "We can't give up on Carley." If you or someone you know would like to help, it would be a great blessing. Friends and family have opened an account for Carley.
