A message from an editor:

This is Kenneth Pounders II and I will be upgrading this site into a completely new look and focusing on fresh, new content on a daily basis. **DO NOT WORRY!** The site will stay opened and you can (and should) visit often! Now these updates may take any where from days to months (but hopefully not years) I will be working diligently on it. Here are some things I would like to improve:

1. Comments: With this you will be able to go to a specific page,news post or blog post and comment with your thoughts!
2. New header: A header is an image at the top of your website! Usually containing a slogan and a logo (like ours) I'm planning to improve this and create a new banner with more images and more content!
3. Backgrounds: This is an easy thing to improve! I will hopefully be changing the background of this website with something more exciting!
4. Podcasts: A podcast is a sound file that you can listen to from a website (with an online MP3 player) or download from iTunes or directly from our website! BOTH of these options will be available!

I think thats all for now! If you have any suggestions you can email us! Reach me at macdude2@yahoo.com thanks!
